- Ideal solution for in wall plumbing
- Uses just 0.8 gallons per flush (0.8 GPF)
- Two piece toilet
- One flush thoroughly evacuates the bowl every time
- Smooth, low friction ceramic surface helps achieve a cleared bowl every time
- Stylish, inconspicuous and durable flush button
- Meets EPA criteria for WaterSense label
- Meets ADA requirements for bowl height
- Fully glazed 2" trapway for enhanced flush performance
- Limited Lifetime Warranty\*

### STEALTH FLUSH TECHNOLOGY

#### FILLING

1. Water fills the tank and inner chamber, forcing air to the top of the chamber and down the transfer tube.
2. Air is forced through the transfer tube into the trapway exerting positive pressure on the water in the bowl. This pressurizes the trapway and creates a larger water surface area in the bowl.

■ AIR  
■ WATER

#### FLUSHING

1. Flush button is depressed.
2. Inside the inner chamber, the vacating flush water creates a vacuum that depressurizes the trapway.
3. This depressurization creates the suction force that pulls the wastewater into the trapway initiating the siphonic flush action.
4. Water empties from the tank cleansing the bowl and flushing waste down the trapway.
5. The trapway is completely filled producing an ultra highly efficient flush.
